## Library & Information Science in Europe : Regional Perspectives

February 15, 2012 in Events by admin | Permalink

**22 june 2012, within the LIDA conference in Zadar Croatia**

**Location: Aula Magna, University of Zadar**

**11:30-12:30 Panel: ASIST in Europe (Christian Schloegl, David Bawden, Fidelia Ibekwe-SanJuan, Isto Huvila, Nick Belkin and Tefko Saracevic)**

**15:30-16:30 Papers: Information Science in Europe**
- Christian Schloegl (University of Graz, Austria)
*Information Science in Europe: A Scientometric Analysis*

- Lyn Robinson and David Bawden (Center for Information Science, City U London, UK)
*So wide and varied: the British origins of information science*

- Elena Corradini (U of Parma, Italy)
*Evolution of IS in Italy*

**16:30-17:00 Coffee Break**

**17:00-18:00 Papers: Information Science in Europe**

- Franjo Pehar and Tatjana Aparac-Jelušić
*History and origin of information scienceS in Croatia: with an special emphasis on growth of regional and international activities*

- Isto Huvila, Preben Hansen, Jeppe Nicolaisen and Nils Pharo (Uppsala University, Sweden and Åbo Akademi University, Finland; Swedish Institute of Computer Science, Sweden; Royal School of Library and Information Science

**Libraries in the Digital Age (LIDA)** is a biennial international conference that focuses on the challenging and rapidly transforming nature of libraries and information systems and services. In recognition of today's continually evolving online and mediated technological environment, "CHANGES" is this year's theme. LIDA 2012 brings together researchers, educators, practitioners, and developers from all over the world in a forum for personal exchanges, discussions, and learning, made memorable by being held in an enchanting and beautiful city on the shore of the Adriatic Sea.

## Visioning Future Emergency Healthcare Collaboration: Perspectives From Large and Small Medical Centers

**Hanna M. Söderholm**

E-mail: hanna.maurin@hb.se

**Diane H. Sonnenwald**
University College Dublin, Belfield, Dublin 4, Ireland. E-mail: diane.sonnenwald@ucd.ie

New video technologies are emerging to facilitate collaboration in emergency healthcare. One such technology is 3D telepresence technology for medical consultation (3DMC) that may provide richer visual information to support collaboration between medical professionals to, ideally, enhance patient care in real time. Today only an early prototype of 3DMC exists. To better understand 3DMC's potential for adoption and use in emergency healthcare before large amounts of development resources are invested we conducted a visioning study. That is, we shared our vision of 3DMC with emergency room physicians, nurses, administrators, and information technology (IT) professionals working at large and small medical centers, and asked them to share their perspectives regarding 3DMC's potential benefits and disadvantages in emergency healthcare and its compatibility and/or lack thereof with their and their organization's current ways of working. We found that social and technical challenges can be identified regarding new innovations even before working prototypes are available. The compatibility of 3DMC with current ways of working was conceptualized by participants in terms of processes, relationships,

their potential impact on medical care (AHCPR, 1996) but also their propensity for adoption and use within the emergency healthcare context. Results from previous research in innovation adoption and use (e.g., Rogers, 1995; Venkatesh, Morris, Davis, & Davis, 2003) have consistently shown that when innovations are not perceived as providing advantages over current ways of working, being compatible with existing values and structures, or being easy to try out and use people will not use them unless perhaps there is strong social influence to use the innovation. Our previous research evaluated the potential impact of a new video technology, called 3D medical consultation (3DMC) (Welch et al., 2009), or 3D telepresence, on emergency healthcare (Sonnenwald et al., 2008; Söderholm et al., 2008). In this paper we investigate its propensity for adoption and use in large and small medical centers.

A goal for 3DMC is to provide a seamless view of a remote scene, and the ability to interact with people and virtually

# ASIS&T WEBINARS

Welcome to ASIS&T Webinars, your source for online live and on-demand content, created by the American Society for Information Science & Technology. Our webinars connect you with experts and global thought leaders in information science, management, and business on relevant professional issues.

When you register for the live webinar, you will have the opportunity to submit questions to the presenter. Once the webinar is broadcast, registered members and non-members will have unlimited access for 30 days. Afterwards, webinars will be available online. Most will be free to ASIS&T members by signing in to our website.

## Upcoming Live Webinars

Delivery and Assessment of a Blended/Hybrid Learning Course [free to ASIS&T Members]
*Bill Wisser*
Thursday, June 21, 2012

Tools for Presentation, Collaboration, and Communication in a Blended Course [free to ASIS&T Members]
