ANIVERSARIO

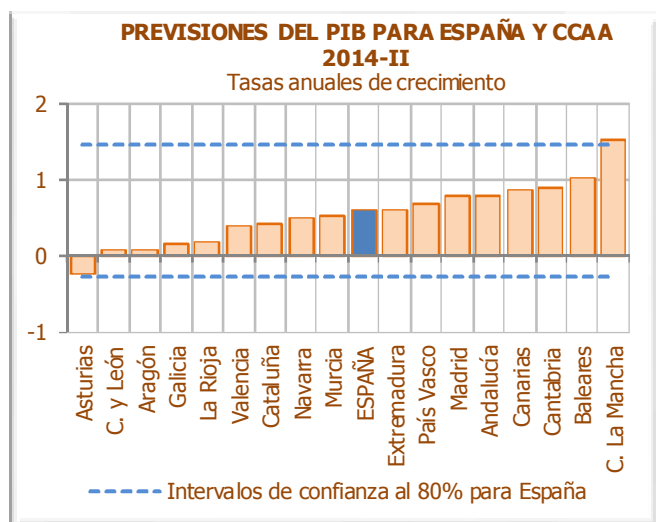

**Baleares y Extremadura son las CCAA con mayor y menor inflación prevista para la media anual en 2014, del 0.6% y -0.1%, respectivamente.**

Fuente: INE &amp; BIAM (UC3M)

Fecha: 14 de mayo de 2014

**Todas las CCAA, salvo Asturias, experimentarán crecimiento positivo en el II-2014, con una dispersión en las cifras muy inferior a la media histórica.**

Fuente: INE &amp; BIAM (UC3M)

Fecha: 29 de mayo de 2014

En abril de 2014, la tasa interanual de inflación se situó por debajo de lo esperado en once Comunidades Autónomas: Asturias, Baleares, Canarias, Cantabria, Castilla y León, Cataluña, Valencia, Extremadura, Galicia, Madrid y La Rioja, siendo las seis Comunidades restantes igual a la predicción.

Para mayo de 2014, según nuestras predicciones, se espera que la inflación interanual sea positiva en todas las Comunidades Autónomas, salvo en Extremadura que continuará con tasas negativas de crecimiento en los precios hasta agosto de 2014.

En este informe se presentan nuestras previsiones para el primer trimestre de 2014 sobre el crecimiento del PIB de todas las CCAA, actualizadas tras la publicación de la CNTR I-14. El detalle del crecimiento trimestre a trimestre del PIB de todas las CCAA hasta final de 2015 se puede recibir bajo suscripción solicitándolo en [laborat@est-econ.uc3m.es](mailto:laborat@est-econ.uc3m.es).

Actualizados nuestros modelos con la CNTR del I-14 con el resto de indicadores cualitativos y cuantitativos de alta frecuencia, nuestras previsiones para el PIB español se revisan a la baja una décima para la media anual de 2014, hasta un 0.8% ( $\pm 0.8$ ) y tres décimas para la media anual de 2015, hasta un 1.3% ( $\pm 1.7$ ).

Según nuestras previsiones, esperamos que Castilla La Mancha sea la CA que más crezca en II-14, un 1.5%. Mientras que Asturias tendría un crecimiento negativo del 0.3%.

El apéndice estadístico en el que, con tablas y gráficos, se muestra la evolución de una extensa base de datos de indicadores económicos que cubren la práctica totalidad de los sectores productivos de todas las CCAA se ha actualizado hasta el último dato observado. Esta base de datos incluye como referencia el cuadro de la evolución anual de los distintos VAB sectoriales de cada Comunidad Autónoma.

## I. ANÁLISIS POR COMUNIDADES AUTÓNOMAS

### I.1. INFLACIÓN

En abril de 2014, la tasa interanual de inflación se situó por debajo de lo esperado en once Comunidades Autónomas: Asturias, Baleares, Canarias, Cantabria, Castilla y León, Cataluña, Valencia, Extremadura, Galicia, Madrid y La Rioja, siendo en las seis Comunidades restantes igual a la predicción. Esto se ha debido, sobre todo, a la componente subyacente, cuyas innovaciones han sido negativas en todas las Comunidades Autónomas (véase Cuadro II.1.1 y Gráfico II.1.1). Por otro lado, las innovaciones en energía han tenido un comportamiento contrario (innovaciones positivas) en todas las CCAA, excepto en Baleares y Canarias.

La tasa de inflación anual para el total de España fue del 0.4% en abril, cinco décimas por encima de la del mes precedente. Por CCAA, sólo Extremadura y Navarra experimentaron tasas de crecimiento negativas, del 0.2% y 0.1%, respectivamente. Cataluña es la Comunidad Autónoma que mayor crecimiento interanual presenta, del 0.7%, seguida por el País Vasco con un crecimiento del 0.6% en abril.

Para mayo de 2014, según nuestras predicciones, se espera que la inflación interanual sea positiva en todas las Comunidades Autónomas, salvo en Extremadura que continuará con tasas negativas de crecimiento en los precios hasta agosto de 2014. Navarra se unirá a esta tendencia en junio y Murcia lo hará en julio. En el mes de agosto serán once las CCAA que registren inflación negativa. Esto es debido a la evolución del precio de los alimentos no elaborados, en particular el precio de las frutas. A partir de septiembre todas las Comunidades presentarán tasas positivas de crecimiento de los precios, comportamiento que desde el pasado septiembre no se repetía, como muestra el Cuadro I.1.4.

Con la información actualizada a 29 de mayo de 2014, nuestras previsiones para las tasas anuales de inflación total media de 2014 y de 2015 en el conjunto nacional son del 0.3% ( $\pm 0.50$ ) y del 1.1% ( $\pm 1.41$ ) respectivamente, que se ha mantenido en los niveles previos para 2014 y se ha revisado una décima al alza para 2015.

Por CCAA, nuestras previsiones para la inflación total media anual de 2014 sufren revisiones a la baja en Asturias, Baleares, Canarias, Cantabria, Extremadura, Galicia, Madrid y La Rioja. Por otro lado, Castilla La Mancha es la única que se revisa al alza una décima hasta el 0.2%, como muestra el Cuadro I.1.2. El resto de CCAA se mantienen con la misma tasa de crecimiento media anual prevista con anterioridad. La tasa media anual

Fecha: 14 de mayo de 2014

Gráfico I.1.1

Fuente: INE & BIAM (UC3M)

Fecha: 14 de mayo de 2014

para 2015 se revisa una décima al alza en nueve CCAA, mientras que el resto permanecen con el mismo crecimiento esperado. Baleares y Extremadura son las Comunidades Autónomas con mayor y menor inflación prevista tendrán una inflación media anual en 2014, del 0.6% y -0.1%, respectivamente. Para la media anual de 2015, la Comunidad con mayor crecimiento medio sería Cataluña, del 1.5%, mientras que la de menor crecimiento esperado sería Andalucía (0.8%), como muestra el Gráfico II.1.4.

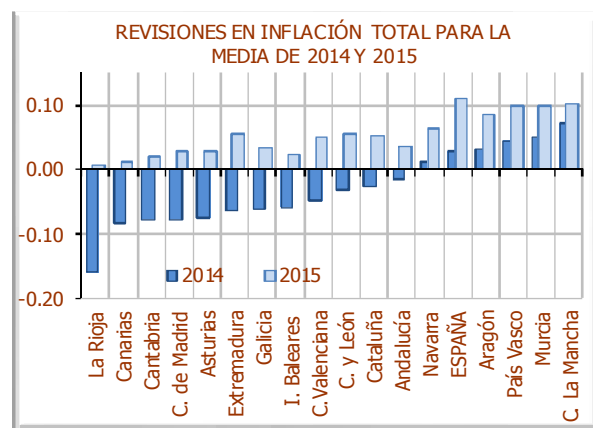

Por grupos especiales, la mayor de las revisiones se produce en el grupo de alimentos no elaborados, que se ha revisado al alza, en promedio de las CCAA, un 0.5% y un 0.9% para la media de 2014 y 2015, respectivamente. En el caso de la energía, la predicción de la tasa interanual media de 2014 se ha revisado al alza en 3 décimas en promedio, mientras que para el promedio de previsiones por CCAA no se ha revisado.

**INFLACIÓN ESPERADA PARA 2014 EN LAS COMUNIDADES AUTÓNOMAS DE ESPAÑA**

Tasa anual media de crecimiento\*

\* Para cada Comunidad se señala si las revisiones sobre la tasa de crecimiento medio anual han aumentado (↑), disminuido (↓), o se mantienen iguales (≈) respecto a nuestro informe anterior.

### I.3. CONTABILIDAD REGIONAL

**Revisión a la baja de nuestras previsiones para el PIB español para la media anual de 2014 y de 2015, hasta un 0.8% ( $\pm 0.8$ ) y un 1.3 ( $\pm 1.7$ ), respectivamente.**

**Todas las CCAA salvo el Principado de Asturias, experimentarán crecimiento positivo en el II-2014, con una dispersión en las cifras muy inferior a la media histórica.**

Junto al detalle por oferta y demanda, a continuación se detallan nuestras previsiones del PIB español por CCAA. Como viene siendo habitual, en este boletín se presentan estas previsiones para el segundo trimestre de 2014 exclusivamente. Sin embargo, el detalle para todos los trimestres hasta el último de 2014 puede recibirse bajo suscripción, solicitándolas en [laborat@est-econ.uc3m.es](mailto:laborat@est-econ.uc3m.es).

Para la actualización de estas predicciones se ha tenido en cuenta, no sólo el pronóstico actualizado del PIB nacional, sino también la evolución reciente de los indicadores de coyuntura de todas las CCAA, cuyos resultados se introducen mediante el cálculo de un indicador sintético, que agrupa la información de 10 variables para cada CCAA.

En cuanto al agregado nacional, en el primer trimestre de 2014 el PIB español aceleró su ritmo de crecimiento intertrimestral en dos décimas hasta el 0.4%. En tasa interanual, el PIB experimentó una aceleración de 7 décimas hasta el 0.5%, primera tasa positiva desde el tercer trimestre de 2011.

Actualizados nuestros modelos con la CNTR del I-14 con el resto de indicadores cualitativos y cuantitativos de alta frecuencia, nuestras previsiones para el PIB español se revisan a la baja una décima para la media anual de 2014, hasta un 0.8% ( $\pm 0.8$ ) y tres décimas para la media anual de 2015, hasta un 1.3% ( $\pm 1.7$ ).

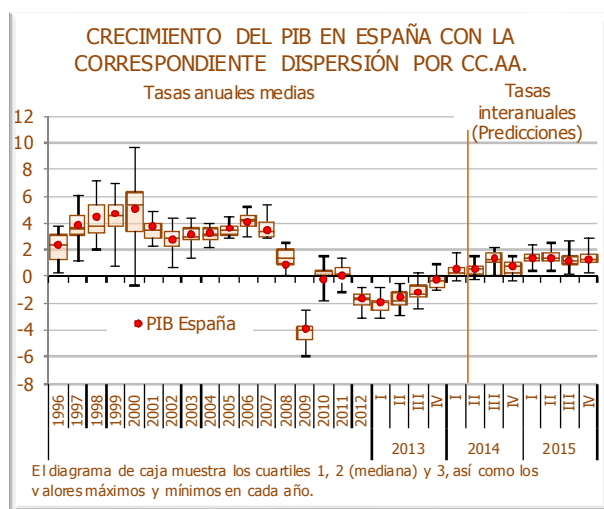

En el Gráfico I.3.1 de este informe se recoge la dispersión del crecimiento del PIB por CCAA respecto al crecimiento del agregado nacional. Como muestra dicho gráfico, la muy lenta recuperación esperada para algunas CCAA españolas podría coincidir con un comportamiento más favorable de otras regiones, por lo que según nuestras previsiones la dispersión entre sus crecimientos tiene cierta tendencia a ampliarse durante todo el periodo de predicción. Este factor debería tenerse presente al establecer los objetivos de déficit por CCAA. En general el crecimiento muestra una dispersión muy baja, con un recorrido de la variable (diferencia entre el mayor y menor valor) de 1.8 puntos porcentuales, contrastando con los casi cuatro puntos de media en 2009 y 2010. Ello se traduce en que no hay ninguna Comunidad Autónoma que destaque con

claridad en crecimiento, ni ninguna que se esté quedando especialmente rezagada, lo cual sería neutral en términos de convergencia entre los territorios.

Además, el Gráfico I.3.2 muestra como en el segundo trimestre de este ejercicio las tasas de crecimiento del PIB de todas las Comunidades Autónomas, excepto en el caso de Asturias y Castilla La Mancha, podrían situarse dentro del intervalo de confianza del crecimiento esperado del PIB del agregado nacional en dicho trimestre. Es decir, se espera un crecimiento homogéneo sin que ningún territorio tire con claridad de la economía nacional.

Según nuestras previsiones por Comunidades Autónomas, esperamos que Castilla La Mancha, Baleares y Cantabria sean las CCAA que más crezcan en el segundo trimestre del año, del 1.5%, 1.0% y 0.9%, respectivamente. Por otro lado, Asturias se anotaría un crecimiento negativo cercano a las 3 décimas, siendo además la única Comunidad que decreciera. En tasas positivas pero inferiores a la media nacional, se situarían Castilla y León, Aragón y Galicia, que estarían en el entorno a la décima (0.1%) de crecimiento. Véase Gráfico I.3.2 y Cuadro I.3.1.

### B. INFORMES TRIMESTRALES<sup>3</sup> SOBRE EL CRECIMIENTO DE LAS CC.AA. Y OTROS SERVICIOS REGIONALES.

Obtenidas mediante modelos econométricos con indicadores sintéticos adelantados para cada CA, utilizados para la trimestralización y predicción del PIB de cada CA. Las interpolaciones y las predicciones trimestrales de cada CA son consistentes con el dato anual medio del año de la CA en cuestión. Además, en cada trimestre los datos de los PIB's de todas las CC.AA. son consistentes con el correspondiente agregado nacional y todo ello teniendo en cuenta las restricciones no lineales que los índices encadenados imponen.

|                                                                       |                                                                                                                                                                                                                                                                                                   |
|-----------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>B1. Informe trimestral específico de una CA concreta</b>           | Predicciones trimestrales y análisis comparativo con España y la Euro Área de las tasas anuales y trimestrales del PIB de la CA. Análisis cíclico del perfil de crecimiento de la CA y su comparación con España y la Euro Área. Acceso a la base de datos de indicadores económicos de dicha CA. |
| <b>B2. Informe trimestral general sobre todas las CC.AA</b>           | Predicciones trimestrales y análisis comparativo con España y la Euro Área de las tasas anuales y trimestrales del PIB de todas las CC.AA. Análisis económico basado en agrupaciones de las CC.AA según perspectivas económicas. Acceso a la base de datos de indicadores económicos de una CA.   |
| <b>B3. Acceso a la base de datos de indicadores de una sola CA</b>    | Actualización mensual de la base de datos de indicadores de actividad de alta frecuencia que cubren los principales sectores económicos, incluyendo datos de crédito y de situación fiscal, de una CA específica (en torno a 15 indicadores mensuales y trimestrales).                            |
| <b>B4. Acceso a la base de datos de indicadores de todas las CCAA</b> | Actualización mensual de la base de datos de indicadores de actividad de alta frecuencia que cubren los principales sectores económicos, incluyendo datos de crédito y de situación fiscal, de todas las CC.AA. Españolas (en torno a 255 indicadores mensuales y trimestrales).                  |

Notas: IPI: Índice de Producción Industrial  
ISE: Indicador de Sentimiento Económico  
IPC: Índice de precios al consumo  
IPCA: Índice de precios al consumo Armonizado  
CNTR: Contabilidad Nacional Trimestral

Por CCAA, nuestras previsiones para la inflación total media anual de 2014 sufren revisiones a la baja en Asturias, Baleares, Canarias, Cantabria, Extremadura, Galicia, Madrid y La Rioja. Por otro lado, Castilla La Mancha es la única que se revisa al alza una décima hasta el 0.2%. El resto de CCAA se mantienen con la misma tasa de crecimiento media anual prevista con anterioridad.

## INFLACIÓN ESPERADA PARA 2014 EN LAS COMUNIDADES AUTÓNOMAS DE ESPAÑA

Tasa anual media de crecimiento\*

\* Para cada Comunidad se señala si las revisiones sobre la tasa de crecimiento medio anual han aumentado (↑), disminuido (↓), o se mantienen iguales (≈) respecto a nuestro informe anterior.
