

Microstructural design via ultrafast heating to improve
mechanical properties of a low carbon steel

by

Miguel Ángel Valdés Tabernero

A dissertation submitted by in partial fulfillment of the requirements
for the degree of Doctor of Philosophy in

Materials Science and Engineering

Universidad Carlos III de Madrid

Advisor:

Dr. Ilchat Sabirov

Tutor:

Dr. Jon M. Molina-Aldareguia

Abril 2020

ANNEX

In this paragraph:

4. Published peer-reviewed manuscripts

the following article has been extracted and deposited separately

4.1 Effect of ultrafast heating on the properties of the microconstituents in a low-carbon steel

M. A. Valdes-Tabernero*, F. Vercruysse, I. Sabirov, R.H. Petrov, M.A.

Monclus, J.M. Molina-Aldareguia, *Metallurgical and Materials Transactions, A* 49 (2018), 3145-3150.
